

# DF Series Direct Fired Vaporizer

algas-sdi.com

## **Key Points**

- No electricity required
- Auto re-ignitor standard
- Double liquid carryover protection
- Thermostat easily operated with gloves
- **Easy access inlet valve**
- Low profiles (40/40 thru 120/60) for ease of portability
- Proprietary capacity control valve prevents lock up
- Burner gas isolation valve provided
- Thermowell allows easy replacement of gas valve
- "Snap-in" 40/40 pilot assembly
- UL Approved, CE Marked, PED Stamped

**Algas-SDI** direct fired vaporizers all carry the ASME U stamp, UL Approval (US and Canada) and the CRN mark for all Canadian Provinces. The 40/40 – 120.60 also carry the PED and CE/PED (DNV) marks.

Our **DF Series** vaporizer, first patented in 1932, remains the most commonly used vaporizer in the world! It's simple, economical and easy to install. When an application lacks electricity or requires portability, **this is the ideal solution.** 

### **Operational Overview**

By design, **DF Series direct fired** vaporizers apply heat directly to a pressure vessel containing liquid LPG. The heating process induces vaporization, while consuming a small amount of the vapor generated. DF Series vaporizers ensure a continuous vapor supply to your application.

Algas-SDI vaporizers are built tough. A rugged heavy gauge metal enclosure with powder coat applied over zinc plating protects against harsh environments. The stainless steel exhaust flue and stainless steel tubing eliminate corrosion and extend service life. The stainless steel tubing also minimizes potential clogging of the vaporizer's temperature controller and burner orifices.

Access to the vaporizer internals is provided via a <sup>1</sup>latch-less reliable door panel. The design allows easy removal of the burner if required. Our domed exhaust top combined with our unique flue collar design, prevents water rain infiltration to the burner. **Algas-SDI** provides an automatic 9VDC re-ignitor as standard. When service requires replacement of the re-ignitor, spade connectors make the field change simple. Removal of the 9VDC battery allows the end user to disable the re-ignitor.

<sup>&</sup>lt;sup>1</sup> Latch-less doors are provided in Models 40/40 thru 120/60

### **IDEALLY SUITED FOR:**

High Pressure Vapor

Agriculture/ Orchards

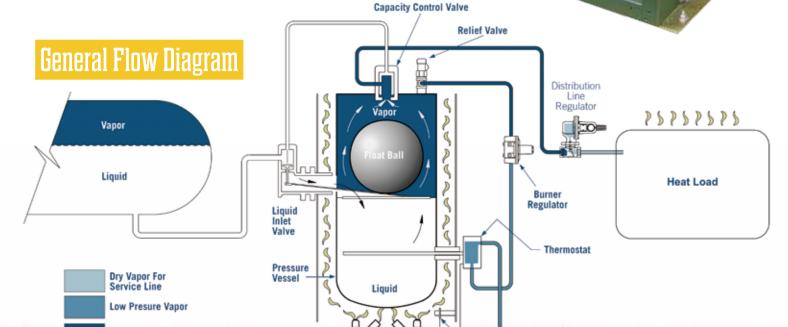

Animal Confinement

Crop Drying

Construction Heating

Burner

Pilot Assembly

# **DF Series™ Specifications**

Vaporization Type:	Direct Fired / Flow Through							
Electrical Data:	None Required							
Model Number:	40/40	80/40	120/60	160H	320H	480H	640H	800H
<sup>1</sup> Design Pressure	290 PSIG / 20.0 Barg							
Relief Valve Set Point	250 PSIG / 17.2 Barg							
Hydrostatic Pressure	435 PSIG / 29.9 Barg							
Vaporizer Approvals:								
ASME, UL (US and Canada)	•	•	•	•	•	•	•	•

### **Optional Accessories:**

- Economy Operation Kit
- · Filtaire for Heavy Ends
- Relief Valve "Pipe Away" Adapter
- Auto Ignition Kit-110VAC
- . Indoor Installation Kit (for roof penetration)

Algas-SDI developed its first vaporizer in 1932. Over eighty years later, we still lead the market in quality, innovation and commitment to purpose. Our products allow businesses located off the gas grid or under curtailment, to operate. We eliminate downtime ensuring workers can work and goods and services can flow to market.
